
Unified Multimodal State
geometry · agents
semantics · uncertainty
Long-Horizon Reliability
stable rollout · feedback
interaction · uncertainty
Generation-to-Planning Bridge
quality → utility →
closed-loop evidence
Efficiency and Scalable Deployment
latency · memory
rollout budget · shift
monitoring
Foundation-Model-Assisted Safety Validation
semantic coverage · grounding
abstention / fallback
state → rollout validity
rollout → decision utility
utility under compute limits
grounded safety evidence
validation findings refine representation and rollout design
Joint profile: state validity · horizon · decision utility · latency · safety evidence
